The Latex typesetting markup language is specially suitable for documents that include mathematics. Formulas are rendered properly an easily once one gets used to the commands.

Given a set of numbers, there are elementary methods to compute its Greatest Common Divisor, which is abbreviated GCD. This process is similar to that used for the Least Common Multiple (LCM).

Acronyms

GCD Greatest Common Divisor. 1

LCM Least Common Multiple. 1

Glossary

 $\mbox{ formula } \ A \ {\rm mathematical \ expression.} \ 1 \\$

latex Is a mark up language specially suited for scientific documents. 1

mathematics Mathematics is what mathematicians do. 1
